

KAMELIA SALAMEH QUMSIEH

Amman, Jordan | +962 79 125 0207 | kmy2212189@ju.edu.jo

PROFESSIONAL SUMMARY

Computer Engineering student (GPA: 3.75/4.0) with strong foundation in software engineering, backend development, and scalable system design. Experienced in building full-stack applications using Java and C# .NET, with hands-on work in APIs, databases, and distributed system concepts. Passionate about solving complex problems and developing high-performance, maintainable systems.

TECHNICAL SKILLS

Languages: Java, C#, Python, C, Assembly

Web: HTML, CSS, JavaScript, PrimeFaces

Frameworks: ASP.NET MVC (.NET)

Database: SQL, Relational Database Design

Concepts: OOP, Data Structures, Algorithms, REST APIs, Multithreading, Clean Code

Tools: Git, GitHub, Debugging, UML

EDUCATION

University of Jordan — B.Sc. Computer Engineering (GPA: 3.75/4.0)

PROFESSIONAL EXPERIENCE

Java Developer Trainee — ZEVA (Palestine | 3 Months)

- Engineered backend logic using Java and object-oriented design principles
- Improved code maintainability by applying clean architecture practices
- Diagnosed and resolved software issues through structured debugging
- Translated functional requirements into efficient technical solutions

Web Development Trainee — ICSF (Jordan | 2 Months)

- Developed responsive web interfaces using HTML, CSS, JavaScript, and PrimeFaces
- Built reusable UI components to enhance system usability and performance
- Integrated frontend components with backend logic

ASP.NET MVC Course — 4 Months

- Designed and implemented full-stack applications using C# .NET
- Developed RESTful APIs and integrated relational databases
- Built scalable CRUD systems with structured data handling

PROJECTS

University Recognition System (UniDashboard) — C#, ASP.NET MVC, SQL, JavaScript

- Architected and developed a modular full-stack system managing complex academic data across multiple domains
- Designed and implemented relational database schema for dynamic data storage and retrieval
- Built asynchronous UI interactions using AJAX, improving responsiveness and user experience
- Structured application using MVC architecture to ensure scalability and maintainability

Multiplayer Guessing Game — Java, TCP/IP, Multithreading

- Built a concurrent client-server system supporting multiple simultaneous users
- Implemented efficient communication protocol using TCP sockets
- Managed thread-based concurrency to ensure system stability under load

LEADERSHIP

Captain — Palestinian National Basketball Team (12 years)

- Led teams in high-pressure environments, demonstrating strong leadership and communication skills

LANGUAGES

English (Professional), Arabic (Native), Russian (Native)
