Why do I feel this way when everything seems fine?

**1 in 5 people will experience
depression at some point in
their lives, many remain
undiagnosed, especially in
Arabic-speaking countries.
The Struggle No One Sees**

Our Vision

- To support individuals experiencing depression, especially within Arabic-speaking communities, through an accessible, supportive, and intelligent mobile application.
- We aim to provide early detection, continuous mood tracking and feedback, personalized self-care tools, guided therapeutic activities, and bilingual support to promote mental well-being and emotional resilience.

What's Missing in Today's Apps?

- Most mental health apps do not properly support the Arabic language or consider cultural differences.
- People experiencing depression often feel misunderstood because the apps are not designed for Arabic-speaking users.
- Without artificial intelligence, many apps cannot personalize support based on a user's mood, behavior, or needs.
- Families receive little insight, as apps lack smart tracking and meaningful feedback

Why Rewaa Stands Out?

- Fully bilingual support (Arabic & English)
- AI-powered analysis to understand mood patterns and emotional needs
- An intelligent chatbot that provides support and guidance anytime
- Sends notifications and updates to family members for better support
- Free to use, making mental health support accessible to everyone.

From Vision to Experience

Bringing REWAA to Life

Now that we've explored what's missing in current depression support solutions, it's time to introduce the heart of REWAA, the user experience.

Because supporting mental health isn't just about tools or technology, it's about how the person feels.

Rewaa in Mind The Healing Journey Flow

Our tech stack was chosen for speed and efficiency. Flutter enables cross-platform development with a single codebase and rich UI, while Dart provides a clean, high-performance structure optimized for mobile applications. Android Studio was used as the development environment due to its powerful debugging tools, emulator support, and seamless integration with Flutter and Firebase.

Functional Features & UI Walkthrough

- Authentication: Secure login for patients and therapists using email/password or Google Sign-In.
- Cloud Firestore: Storing patient profiles, mental health screening results, and progress tracking data securely in real time.

Functional Features & UI Walkthrough

Rewaa's UI features a tools dashboard, customizable settings, and a progress tracker to monitor mood trends and recovery milestones.

Functional Features & UI Walkthrough

Rewaa Bot uses AI-driven chat to gather patient insights and securely share them with therapists to streamline personalized session booking.

Functional Features & UI Walkthrough

The therapist portal receives instant booking requests along with the patient's AI-analyzed data and chat history, allowing for a well-informed and efficient start to the therapy session.

Functional Features & UI Walkthrough

Rewaa identifies the root causes of depression through user input, then connects these insights to the AI chatbot to provide tailored advice and clinical support.

Functional Features & UI Walkthrough

YouRewad's profile includes an "Emergency Contacts" feature for crisis situations, allowing users to save trusted numbers. When activated, the system sends immediate alerts to these contacts to ensure urgent support is provided when needed most.

Functional Features & UI Walkthrough

Rewaa uses AI-driven facial analysis to detect depression indicators by monitoring micro-movements, providing users with a preliminary screening report to share with their therapist.

Functional Features & UI Walkthrough

Rewaa provides a comprehensive wellness suite featuring educational courses, therapeutic novels, and an interactive "Tree Game" designed to gamify and support the recovery journey.

Functional Features & UI Walkthrough

Rewad's wellness suite offers a rich variety of therapeutic tools, including motivational messages, relaxing music, and guided fitness routines. It also features specialized courses and recreational activity guides to help patients integrate healing into their daily lives.

Functional Features & UI Walkthrough

Rewaa includes the PHQ-9 depression screening tool, a clinically validated questionnaire that helps users assess the severity of their symptoms and track their diagnostic progress over time.

Functional Features & UI Walkthrough

Rewaa offers secure support groups where patients chat anonymously using nicknames. Users can share experiences and images in specialized communities for anxiety and depression to foster peer recovery.

Functional Features & UI Walkthrough

- Comprehensive Network: Provides a centralized directory of all psychiatric clinics and hospitals across Jordan, categorized by city like Amman, Irbid, and Zarqa.
- Transparent Access: Enables patients to easily compare clinics based on precise location and session pricing to ensure an affordable treatment journey.
- Smart Assistance: Features an integrated AI bot to answer immediate questions regarding booking procedures and specific clinic details.

Survey Highlights (or App Impact Survey Insights)

Overall, how beneficial do
you find the app?

Thank You!

We truly appreciate your time and attention. We hope our work on the Rewaa app has highlighted the importance of accessible and supportive tools for individuals experiencing depression. If you have any questions, suggestions, or feedback, we would be glad to discuss them. Together, let us continue building a future where mental health is understood, supported, and prioritized for everyone.

— The Rewaa Team
